

Comprehensive Recycling

For Individuals - Businesses - Communities

tbsindustries

About Us

TBS Industries is an international provider of electronics recycling and asset management services. We offer customized solutions that address the needs and requirements of each client. TBS has the capabilities and professional network to efficiently remove, transport, and process material on a local or national level. In all cases, TBS provides maximum value for your equipment while protecting the environment with its **no landfill policy**.

Service Solutions

Electronics Disposal - we remove, transport, and recycle your unwanted equipment while maintaining a comprehensive no landfill policy.

Asset Management - we design a customized profit sharing solution for valuable equipment to maximize your returns on material that is unwanted but still functional.

Chain of Custody - we identify, secure and document your material throughout the recycling process. Our electronic audit and inventory system enables you to track your material on-line to assure you that it is being handled in a secure and safe manner.

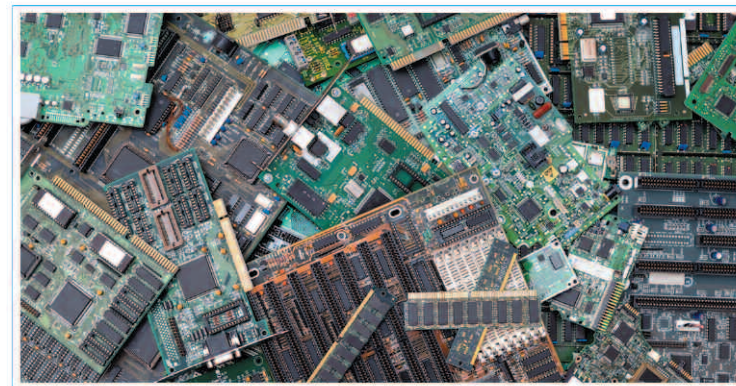

Privacy Safeguards - we offer a wide range of services to prevent the theft of your important and sensitive information. Our services include:

- ♦ equipment shredding
- ♦ on-site hard drive crushing
- ♦ on-site data wiping
- ♦ identification removal

Flexible Logistics - we provide a nationwide, single point-of-contact solution for the disposal of your electronics. With our secure collection network, TBS Industries is an easy, safe, and reliable outlet for your e-waste. We can arrange door to door service for any amount of equipment from a small, local business to a national, multi-location corporation.

Worry-Free Service

TBS Industries is a company that you can trust. For more than 20 years, TBS has been a leader in the recycling of electronic equipment. We proudly employ experienced, industry professionals who are committed to protecting the environment. TBS Industries is a certified, licensed and insured recycler that provides efficient and effective solutions for your electronics recycling needs.

- Unique Equipment** - industrial, medical, point of sale
- Wire** - cables, power cords, extension cords

BENEFITS AND SAFEGUARDS

TBS will plan and implement an effective resource management program that will be customized to satisfy the individual, local or national requirements of your business. Our recycling programs offer you:

Cost Savings

Constant innovations and state of the art technologies accelerate the obsolescence of your electronic equipment. The sooner you remove your unwanted equipment, the greater is the possibility that you will receive more value for your material. TBS Industries provides maximum value for your obsolete equipment and minimizes your costs by providing efficient and comprehensive service at a very competitive rate.

Data Security

Hard drives and other data storage media contain sensitive information that must be safeguarded. Even if data is deleted or the drive is re-formatted, important information can be recovered. TBS safely and permanently eliminates your sensitive data and prevents it from being compromised or stolen. We physically destroy the hardware or use Department of Defense methodology to sanitize your data.

Liability Reduction

You are accountable for the safe and secure disposal of your materials. TBS Industries complies with local, state and federal regulations and takes ownership of your e-waste to isolate you from potential liabilities. We protect you by safeguarding your proprietary data and we protect the environment by responsibly recycling your materials.

Comprehensive Service

Each client has needs and requirements that demand special consideration. If you are a small business or a Fortune 500 company, TBS Industries will service your account at the local or national level. We are listed with the U.S. General Services Administration as a service provider that is approved for government contracts. TBS Industries effectively utilizes its network of professionals and service providers to offer you flexible, comprehensive and efficient service that minimizes your costs and concerns.

Environmental Protection

If your equipment becomes obsolete with no market value, it needs to be removed and discarded. As a Pennsylvania Department of Environmental Protection approved facility, TBS follows U.S. Environmental Protection Agency guidelines to process all equipment in a responsible, safe and legal manner. TBS Industries has a comprehensive no landfill policy that is dedicated to recycle all materials and to protect the environment.

Compliance Documentation

Companies are repeatedly audited and reviewed by government and regulatory agencies to ensure that they comply with applicable laws and regulatory procedures. TBS will identify your material and track it from your dock, through the recycling process, to its final disposition. Our electronic auditing and inventory system will enable you to follow your material on-line. At the completion of the process, we will issue you a detailed report that will document how your equipment was safely handled and how important, sensitive data was safeguarded. TBS Industries will issue you a **Certificate of Destruction** on products dismantled or shredded, or a **Certificate of Recycling** on equipment processed for remarketing.
